

Lesson 11

- Learn to use **time order words** in a process paragraph

Time Order Words

- Use *first* and *second* to indicate the first two steps in the process.
- Use *next*, *then*, *later*, or *after that* to add more steps.
- For the last step, use *finally*.

STEP 1

STEP 2

STEP 3

Time Order Words

- **First**, make a list of places you want to visit.
- **second**, book the tickets online.
- **Next**, pack your bags.
- **Then** arrange for your transport.
- **Later**, think of restaurants you want to go to.
- **After that**, call your friends and say goodbye.
- **Finally**, wake up and go to work. It's Monday!

Connectors

- **Before** and **after** are used as connectors.
- They link two **clauses** together.
- They also link **clauses** and **noun phrases**.
 - **Before** you close the suitcase, check your list.
 - **After** booking the tickets, arrange the transport.

- If you want to run a marathon, you have to train diligently.

First, buy a comfortable pair of running shoes. Then begin your running practice at least six months before you run in the race. Try to run three to six kilometers four times a week. You must also stretch before and after a run to avoid tight muscles. After your body is accustomed to longer runs, you can work on your strength and do short fast runs. Later, lengthen your runs to ten or 12 kilometers. Make sure you drink plenty of water when you go on longer runs. When the day of the race is close, check your shoes. You might need a new pair. The night before the race, eat a lot of carbohydrates. Finally, on the day of the race, get up early and drink plenty of water. **You should feel confident, strong and ready to go.**

Example

Your Task

- Write a **process paragraph** about something you know how to do that might be helpful to someone else.

Next Lesson

- Learn about **imperatives**
- learn to identify and use **modals of advice, necessity, and prohibition.**
